Research Trends in Medical Physics: A Global Perspective

Education in the field of Medical Physics has experienced considerable growth and change from the time when the first publication of this report in 1993. Medical physics is one of the fastest emergent areas of research for academicians and physicists. It plays a vital role in the medical research

The paper presents an analysis of 11181 global publications in medical physics, indexed in Web of science database during 2000-2013; the average number of publications published per year was 798.64. Out of 11181 publications, maximum of 5014 (44.84%) publications have been contributed by mega authors, followed by multi authors with 3588 (32.09% ...

Dr. Gary Ezzell, president of the American Association of Physicists in Medicine (AAPM), talks about current trends in medical physics, particularly the melding of imaging and radiation therapy to guide treatment.

Medical physics research projects, particularly those on a smaller scale, are often driven by clinical demands and available technology. My advice would be to talk with the physicists you work with and see what projects they are working on and then ask if you can help out.

Research at the department of Medical Physics in Radiotherapy is focussed on new conformal radiotherapy techniques with photons, electrons and hadrons. Major achievements of the last two decades were the introduction of 3D treatment planning, Stereotactic Radiosurgery, 3D Conformal Precision Radiotherapy, inverse treatment planning, Intensity Modulated Radiotherapy and Radiotherapy with Carbon-12 Ions.

"I think this is a very interesting area for medical physics research," Muren said. Another factor is the introduction of "big data", which aims to make all outcome data available. While existing models are mostly based on clinical trial data, with some 97% of patients treated outside trials, big data could provide a major opportunity.

How to train the medical physicists of the future ...

This paper describes the concepts of medical physics, trends and the current status of this discipline as a profession, which is directly related to the efforts of clinical research. It is also described what is, in my opinion, the future of medical physics in Mexico, emphasizing the fact that this field requires a ...
