If your receiver is on the right input and REW is configured correctly you should have white noise blasting out of the subwoofer. You might want to keep the receiver volume low so that way you can turn it up with the remote to a "comfortable" level while you hold the spl meter near the mic.

Polar Audio: Step-by-Step setup guide to Room EQ Wizard (REW)

As far as I can tell, this is logically a completely flawed approach. From a system point of view this is the equivalent of listening to every single recording in the same, highly attenuating venue. Every recording is going to have the same HF cuts applied, regardless of how the original recordin...
